FREQUENCY RESPONSE:	(-10 dB) 31 Hz.
SIZE:	117 x 66 x 27 cm. (10")

Evolution of one of our classics. A subwoofer system with the same 18" loudspeaker than before and with an improved resonance device. To be used together with our 1000 Series screen systems or in sub surround applications for Dolby Atmos.

With shallow cabinet 27 cm. deep (10") for the small spaces behind the screen. Despite its little size, this surprising loudspeaker delivers wonderful performance in bigger cinemas. The system is delivered assembled in one carton to save labour costs.
