SIZE:	Net 9,5 Kg.
WEIGHT:	

One of our classics, the well known LW7003, that has been improved in this case with a new best quality piezo horn and a better enclosure for the 8" unit.

This is the most standard model and very appreciated by the technicians because of its easy equalization. With the new 100°x100° horn, the HF reaches the complete audience perfectly. All of the LW surround speakers are delivered with metallic supports but there is also an optional "U" bracket. As usual with all of the LW surround speakers, these could be painted in any RAL color needed by the customer. This model is delivered assembled in cartoons of four units.
